Customers continually emphasize MessageSolution products' excellent overall performance and ease of use, with quick implementation and sub-second data retrieval, along with the intuitiveness of the interface and ease of maintenance. MessageSolution's intelligent back-end design significantly reduces installation requirements, backup time, and the need for technical support calls.

MessageSolution Enterprise Email Archive™ deftly manages petabytes of data daily, a powerful enterprise archiving tool. Electronic discovery and litigation support are empowered by the archive's built-in search engine, which searches through millions of emails within seconds across global locations and data centers. Users can access their archive through their email client, browser, or BlackBerry.

A high in-process compression rate combined with single instance message and attachment archiving slows archive storage growth. Enterprise Email Archive™ further reduces organizations' storage costs by using only 30% of the original mail server storage space for live content archiving.
