

MessageSolution Enterprise Information Archiving, eDiscovery, and SharePoint Governance Technologies Showcasing at SharePoint Connections 2011

As a global technology leader, MessageSolution offers high-performance Enterprise Information Archiving, eDiscovery and SharePoint Governance solutions on both Cloud and on-premise platforms to ensure that organizations meet their compliance, legal discovery, storage management and migration needs

Las Vegas, Nevada (November 1, 2011), Milpitas, CA: MessageSolution, a global technology leader in Enterprise Information Archiving, eDiscovery and SharePoint governance, will be exhibiting its award-winning Enterprise archiving, legal discovery and SharePoint management/migration solutions at SharePoint Connections and Exchange Connections 2011 in Las Vegas beginning November 1 – 3.

Enterprise eDiscovery Platform for Email, File System and SharePoint: MessageSolution eDiscovery Suite streamlines data collection for emails and files from Exchange, File servers and SharePoint environments for processing, analysis, cull-down, and review phases of eDiscovery for legal cases. Legal team uses the eDiscovery system's culling capabilities to prune large datasets to much smaller and more relevant ones. MessageSolution was also the first among enterprise archiving providers in the market to offer a Data Redaction function in its Enterprise eDiscovery Suite.

MessageSolution Enterprise SharePoint Archive: MessageSolution Enterprise SharePoint Archive is an on-premise and Cloud solution for all SharePoint documents life cycle management needs. Users can archive Microsoft SharePoint Server documents for regulatory compliance, litigation readiness for email, files, SharePoint documents, and improving the SharePoint Server performance. It can be deployed standalone or in conjunction with MessageSolution Enterprise Email Archive and File Archive.

"With the industry-leading scalability coupled with our remarkable archiving and eDiscovery software, we are able to save our clients hundreds of thousands of dollars on hardware requirement, SQL management, and data storage while at the same time ensuring that the SharePoint server can function smoothly," says Kevin McInerney, the Global Strategist at MessageSolution. "In addition, MessageSolution extends its enterprise-class migration capability and provides the fastest migration functionality from various sources to SharePoint, It makes SharePoint performance manageable and highly effective.

MessageSolution Enterprise Migration Systems:

MessageSolution offers the leading Enterprise-class systems that offer users the organizational ability to move from GroupWise, Domino and Exchange in any direction. Traditionally a complex and time-consuming process, MessageSolution consolidates steps, while ensures compliance, to provide a seemingly effortless, high-value migration experience.

MessageSolution Enterprise Migration System automatically migrates emails, calendar, address book, appointments, shared folders, distribution lists and more. Since the process is

multi-threaded, it concurrently migrates multiple mailboxes at the same time to ensure an even faster migration process.

MessageSolution migration capabilities also include public folder and file migrations to SharePoint environment, PST/NSF/GroupWise file migration for various email environment, and archived data migration from legacy archiving systems.

MessageSolution Multi-Tenant Archiving Platform for Hosted Exchange, Domino, GroupWise, Scalix, Zimbra and all Linux-based Email Servers: Compatible with Microsoft Multi-Tenant Hosted Exchange, MessageSolution's multi-tenant Archiving Platform allows managed service providers (MSP) or educational school districts to deliver a centralized archiving system on a cost-effective single hardware configuration with multiple archives and administration roles for organizations with their own individual archives. Leveraging MessageSolution's top industry scalability records, MSP partners are able to archive tens of thousands users on a single server to minimize hardware cost and to efficiently leverage MSP's existing service-hosting capacity and datacenter infrastructure to provide SME and organizations around the world a cost-effective yet feature-rich archiving and eDiscovery solution. Multiple school districts have also successfully deployed MessageSolution Multi-Tenant Archiving Platform with a single archiving system to offer dozens of school districts with their own separated archives; hence each school district has its own archive to meet the compliance and eDiscovery requirements.

MessageSolution Enterprise Archive for Exchange, SharePoint and File System: During WinConnection 2009, MessageSolution also became the first in the market to offer an Exchange 2010 Web Services-integrated archiving platform. MessageSolution delivered the first in the market Exchange 2010 Web Services integrated archiving platform at Microsoft WinConnections in November 2009. MessageSolution Enterprise Email Archive operates within an organization's network firewalls and connects to the Exchange server via robust protocols. It captures and archives emails or files based on the company preferred settings. Data is captured, compressed and de-duplicated using single instance storage (SIS) prior to being archived. This process reduces the storage requirements of the archiving server by an average of 75%. The real-time mailbox management feature reduces Exchange information storage for over 90% by creating a transparent link in the user mailbox.

MessageSolution Cloud Computing Technologies: In addition to providing the archiving solution in a public open cloud, MessageSolution Enterprise Archive Software as a Service (SaaS) Platform offers organizations a private cloud which includes extended modules that provide an all-in-one enterprise archiving and eDiscovery solution for email, SharePoint documents and file systems available for organizations of all sizes.

MessageSolution Enterprise Email Archive SaaS Edition is hosted in multiple secured data center locations or Amazon EC2 global cloud network. Data is encrypted as it leaves the enterprise customer's corporate networks where it is securely stored with Advanced Encryption Standard (AES) and RSA secure encryption algorithms in the archive, with industry-leading archiving performance, high availability and disaster recovery. "Enterprise clients are recognizing MessageSolution's value proposition and convenience of Cloud services as well as on-premise deployments." said Kevin Mcinerney, Global Marketing Strategist for MessageSolution, Inc. "With industry record scalability and flexibility, MessageSolution effectively offers both options to SME as well as large enterprise clients."

MessageSolution will be exhibiting at the WinConnection 2011 Booth # 708 on November 1 – 3 at the Mandalay Bay Resort in Las Vegas, NV.
