MessageSolution™

Enterprise Archiving, eDiscovery, Migration

With MessageSolution Multi-Tenancy Archiving Platform, managed service provider (MSP) partners can share in our commitment to product development and build a mutually beneficial relationship while placing emphasis on success and growth with the leading technology provider.

MessageSolution Multi-Tenancy Archiving & eDiscovery Cloud Platform is equipped with a wide range of features critical to MSP datacenter operation & service offering. As the technology provider, MessageSolution delivers Multi-Tenancy Cloud feature-rich archiving solutions to support hundreds of companies or tens of thousands of users on one archiving server. The System is deployed in your datacenters to effectively control hardware costs and exponential data growth.

MessageSolution's Multi-Tenancy Archiving Platform can either be deployed in the MSP partner's datacenters or a Cloud network to offer the flexibility of personalizing the archiving services and to maximize our partner's profitability. MSP partner managed multi-tenancy archiving platform, with the flexibility of designing own services and fee structure, generates 300-500% more revenue than simply connecting to a hosted archiving service provider's archiving service offer.

Deployed on-site in MSPs' datacenters and supporting a broad range of Email server platforms including Exchange, Domino, GroupWise and all major Linux-based email servers, MessageSolution Multi-Tenancy Archiving Platform supports all MSP partners' hosted email platforms and clients' in-house email servers.

Partner Benefits

- Private Cloud; an all-in-one dedicated hosting solution for Enterprise-Class Email, SharePoint & File Server Archiving and eDiscovery.
- Customized or white-label branding brings loyalty and strong client retention.
- Industry record scalability allows one archiving server to archive the most user numbers at the lowest hardware cost to maximize return.
- One hardware server archives over 25,000 users by leveraging the highest scalability in the industry (especially when compared to Tier 1 competitors who required four plus servers.) This translates into tremendous savings on hardware requirements and operation cost.
- Products are available for both Enterprise and Small Medium Enterprise (SME) clients and support the most email server platforms and email services. This offers the most lucrative opportunities designed specifically for managed service providers.
- Hosting Partners can leverage the existing data center / Cloud infrastructure and develop their own multi-tenancy archives and expand service portfolios.
- Fast response global technical support service guarantees issues will be addressed quickly and thoroughly.

Access Archived Data via:

- Web-based administrative and end-user interface
- Outlook, Lotus Notes, GroupWise client integration
- Outlook Web Access, Domino Web Access
- Offline cache mode
- Blackberry mobile devices
