

MessageSolution Enterprise File Archive

The Complete On-Premise and Cloud-Based Archiving Solution

MessageSolution Enterprise File Archive provides a secure, easy-to-use, cost-effective, and high-performance storage management solution in its file archiving system. Enterprise File Archive dramatically reduces the cost and eliminates the complications of data storage, recovery and archiving for compliance, electronic discovery, and storage volume management, without installing any agent on the file server.

As the leading innovator in compliance, storage, and search technology, MessageSolution Enterprise File Archive gives organizations effortless control over their historical files by delivering a comprehensive file management system. It allows users to easily search through massive quantities of files, immediately locate and access data.

Reduce Your Business & IT Risks Surrounding:

- Compliance & eDiscovery
- Storage Optimization
- Information Retention & Protection
- Knowledge Exploitation
- Disaster Recovery
- Operational Efficiency

MessageSolution Enterprise File Archive Provides:

- Fast, easy and secure access to archived content via web browser and Windows desktop search
- Hierarchical storage optimization
- Single instance storage integrated with all servers & clustering
- Full text keyword/phrase and proximity searching, with sub-second search results
- High-powered file compression and de-duplication
- User-friendly web-based administrative interface
- Compatibility with multiple operating systems, including Windows & Linux
- Global online deployment and support

Benefits:

Reduce 60-75% Storage Requirement for Archive Server

Completely automated file compression, single instance storage (SIS), offloading data to cost-effective secondary storage devices (HSM). Unlimited storage for Cloud customers.

Reduce File Server Storage up to 80%

High performance automated stubbing & users transparent retrieving of original files.

Secure Storage

Control users' archive access and use. Enterprise File Archive keeps original file security attributes and guarantees a secured storage archive.

Immediately Access Records

Faster, more accurate searching enables organizations to easily locate and restore data to meet compliance and electronic discovery legal support deadlines without the price tag of traditional discovery methods.

Ease of Archive Maintenance

An intelligent back-end structure facilitates easy backup/restore and requires less maintenance, which significantly lowers long-term cost of ownership.

Increase Productivity

The fully automated process eliminates the time-consuming task of manually managing corporate file system and intelligence, allowing staff to focus on the business at hand.

System Requirements:

Pentium IV 2.0GHz (Minimum)
Processor equivalent to your file server (recommended)
2 - 4GB RAM
40GB hard disk (additional disk space or disk array, NAS, SAN for storage)

Internet Explorer 6, Firefox (User)
1 Network Interface card
The machine can access DNS service
Linux 2.6, Windows 2000 or 2003, 2008, Solaris

How Enterprise File Archive Works

MessageSolution Enterprise File Archive can be delivered as an enterprise-class, on-premise software solution or on a Cloud managed by MessageSolution support. It can be a standalone solution or can be deployed in an all-in-one enterprise information archiving solution with email, SharePoint, OCS, Lync server, etc.

In addition to archiving the contents of candidate files, Enterprise File Archive transparently captures, indexes and archives all compliance-related metadata without impacting end-users. The archive supports all popular file formats and identifies candidate files according to each organization's specifications, it then compresses, de-duplicates, indexes and stores the files. Archived files are available for immediate retrieval in case of emergency situations, compliance audits or eDiscovery litigation requests.

A clean, organized back-end and intuitive interface design makes Enterprise File Archive easy to use and quick to deploy. There is no need for on-site installation, complicated maintenance or archive use classes. Implementing Enterprise File Archive reduces business risk and corporate liability while protecting organizations' investments in their IT infrastructure.

MessageSolution Works for You

MessageSolution file archiving solution helps businesses organize, store, and search their corporate intelligence quickly and securely, even across multiple geographic locations and countries. All MessageSolution products support Unicode for searching in any language, including Latin-based and character-based languages.

Enterprise File Archive is compatible with multiple operating systems and offers full support for all popular compliant storage media platforms, from direct attached disks to EMC Centera. No matter your current or future platform, Enterprise File Archive's flexible architecture fits into your current network file infrastructure and is able to adapt throughout the information lifecycle.

Giving Customers Control and Support

The policy-based archive allows administrators to easily set up retention parameters and limit user access rights to meet each organization's unique archiving objectives. Staff can search for, immediately retrieve and restore their files without IT assistance by using a Windows desktop search or the easily navigable web-based interface.

In case of unexpected problems, MessageSolution offers its customers technical support 24 hours a day, 7 days a week, via email or telephone.
