

MessageSolution Enterprise File Archive

The Complete On-Premise, Cloud, or Service Provider Hosted Solution

MessageSolution Enterprise File Archive (EFA) is a one-stop solution for compliance archiving, eDiscovery and storage management. It provides a secure, highly interactive data store and high-performance eDiscovery system for corporate email systems. EFA drastically reduces the cost and eliminates complications associated with data storage, recovery and information archiving. MessageSolution technologies also give users controlled and self-serving access to archived data.

Industry-Leading Scalability & Solution Flexibility

MessageSolution Platform does not require additional database or software licensing. The solution is the most scalable solution on the market and the archive for 25,000+ users on one server or for several hundred thousand in a clustered multi-server environment. This makes it ideal for both enterprise and SME organizations. MessageSolution also supports cross-platform OS.

Reduce Storage Requirements by 60%

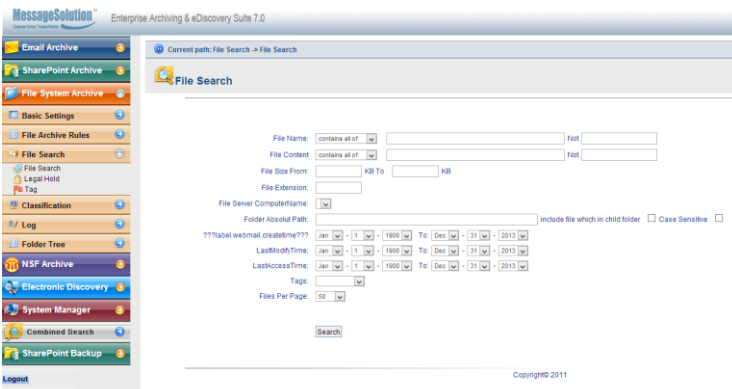

MessageSolution EFA efficiently offloads the data from expensive file server storage to inexpensive hierarchical archiving storage. There is no user-pattern change on the client side, yet large portions of storage space are reduced both on the email and the archiving servers.

MessageSolution also leverages in-process compression and Single-Instance-Storage to reduce storage requirements by up to 60% on the archiving server.

Self-Serve Search & Data Restore

The MessageSolution Platform leverages full-text search by full or partial File Name, Content, Size Range, File Extension, File Server, Folder Path,

Creation, Modification or Access Time and File Tags. Users can also use Wildcard, Proximity and Fuzzy searching to account for phrasing or spelling inconsistencies. Restore archived files to their original location on the file server. EFA can also recover shadow copies - older versions of documents.

MessageSolution Enterprise File Archive 7.0 - Web Console Admin UI – Search Interface

Benefits:

- On-Premise, O365 Cloud and Hybrid Solutions Available
- Server Consolidation Reduces File Storage Export Requirements by up to 60%
- Policy-Based File Retention

2 - 4GB RAM
40GB hard disk
(additional space or disk array, NAS, SAN for storage)
Internet Explorer 6, Firefox (User)
Internet Information Services (IIS)
1 Network Interface card

MessageSolution Enterprise File System Archive

On-Premise, Cloud, and Service Provider Hosted Archiving & eDiscovery

How Enterprise File Archive (EFA) Works

In addition to archiving the contents of candidate files, MessageSolution EFA transparently collects, replicates, compresses and indexes all data for advanced searching, eDiscovery and compliance management. The MessageSolution platform supports over 400 file types including all popular formats. Archived data is almost immediately available for retrieval of business-critical situations, audits or eDiscovery requests.

With configurable and highly granular access controls, users can retrieve their own data or data from custodian accounts without IT involvement. After locating the necessary data, it can be restored to the email server, emailed, downloaded or printed.

Built-In eDiscovery and Advanced Search

MessageSolution performs Fuzzy, Wildcard and Proximity searches for comprehensive data collection. In addition, it offers comprehensive eDiscovery features such as universal legal hold, configurable third-party Legal/Auditor access, and data redaction (a feature not commonly provided in standard email archiving systems).

MessageSolution also offers an advanced eDiscovery platform designed to direct eDiscovery requests from IT to the legal team. Features include Multiple Case Management, Case-Specific Access Authorization and Review Delegation, Legal Annotation, etc.

Desktop Integration

MessageSolution Enterprise File Archive Suite Edition also offers direct file server integration through the Desktop Plug-In.

Advanced Desktop Integration offers:

- Desktop Searching & Access to Archived Data
- Data Offloading from the File Server
- Offline Archiving

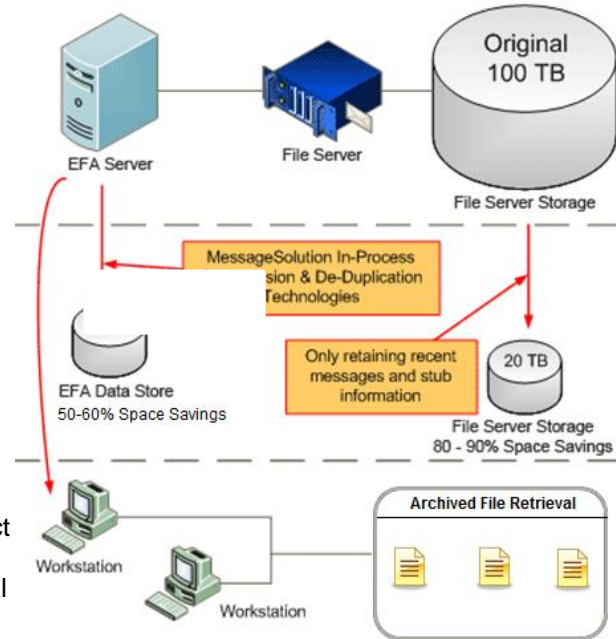

File Server to SharePoint Data Migration

As Microsoft SharePoint becomes increasingly prevalent, organizations must look for a way to migrate their data and archive new SharePoint content.

MessageSolution migration system offers SME and enterprise clients the means to migrate data from the file server to SharePoint. Once the data has been migrated, it is archived, searched and accessed just like archived file server data.

MessageSolution EFA On-Premise & Cloud Architecture

File Archiving in the Cloud

In addition to on-premise archiving servers, MessageSolution offers secure and hands-off archiving solutions.

With AES and SSL security, regularly audited SSAE Type II data centers and granular user-access control, MessageSolution offers all the safety and functionality of enterprise archiving without the overhead costs or daily management.

MessageSolution is integrated with Online Systems of Microsoft Azure, IBM Cloud, Amazon EC2, etc.

MessageSolution offers dedicated hosting platform for enterprise organizations.

About MessageSolution

MessageSolution, an industry technology leader in enterprise information archiving and eDiscovery, provides Cloud, on-premise and MSP/ISP-hosted multi-tenant platforms for corporate and datacenter email, SharePoint, and file systems. Managing compliance, legal discovery and storage cost control, MessageSolution is the recipient of multiple industry awards for providing best enterprise and cloud archiving & eDiscovery platforms for global enterprise and SME customers of all sizes across all industries.
