

MessageSolution File Archive Analysis (FAA)

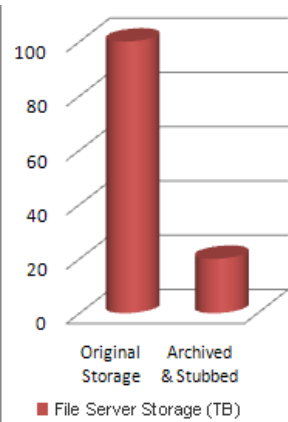

On-Premise and Cloud Solution for Compliance, eDiscovery and Privacy Protection

MessageSolution File Archive Analysis (FAA) is a one-stop file management hub for CCPA, GDPR, and HIPAA compliance archiving audit, eDiscovery and storage management. It provides a secure, highly interactive data archive and high-performance eDiscovery for corporate file systems. FAA drastically reduces the cost for compliance and eDiscovery management, and eliminates complications associated with file server consolidation and file deduplication, securing users a self-serving desktop as well as web access to archived file data.

Industry-Leading Scalability & Solution Flexibility

MessageSolution Platform does not require any additional database or software licensing. The solution is the most scalable solution on the market and can archive for 25,000+ active users on each archive server/VM or for several hundred thousand in a clustered multi-server environment. This makes it ideal for both enterprise and SME organizations, and MSP datacenter operations.

FAA Decompression & Deduplication

Privacy Protection

CCPA and GDPR require identifying and managing private information through tagging, access privileges, management. FAA scans for sensitive information From a library of discovery templates.

Consolidate file share data scattered data across the enterprise. Identify tag and, classify unprotected Personally Identifiable information (PII).

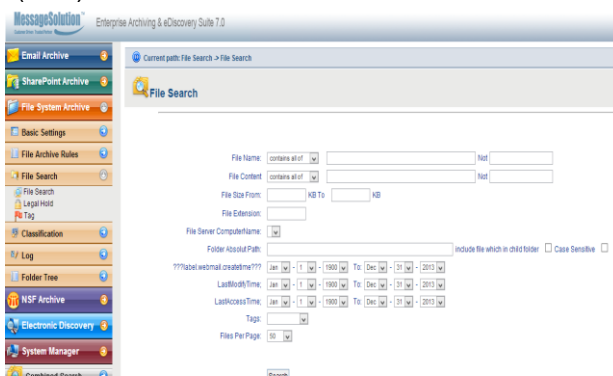

Centrally manage security permissions provide shared access, and respond when necessary to Data Subject Access Requests.

Search, Restore, Litigation Support

The MessageSolution Platform leverages full-text indexing search by full or partial File Name, Content, Size Range, File Extension, File Server,

Folder Path, File Creation, Modification or Access Time & File Tags. Users can Search and Restore using Search within a Search, Search between dates, use Proximity Search to restore and download archived files to their original location on the file server. FAA also recovers shadow copies - older versions of documents.

MessageSolution Enterprise File Archive Analysis (FAA) - Web Console Admin UI – Search Interface

Benefits:

- Easy to Deploy and Support
- High Speed Search Tens of Millions of File Records Without SQL Backend or Dedicated DBA
- Desktop Search Client for Easy Access to Archive
- Sub-Second File Search & Restore
- Tag & Download Files
- Search and Download by Keywords, by File, File Size, File Creation, File Accessed, and File Modified
- Unified searching across all archived data repositories
- Preserves Original Metadata for File Download & Data Export
- Permission-based Access to File Folders
- MD5 Hashing Version Control for Data Integrity
- File Level Deduplication and Compression
- In-Process Data Compression & File-Level Deduplication Storage
- HSM and Object Storage
- Server & Storage Consolidation Reduces File Storage by Up to 90%
- CIFS SMB 3.0 File Sharing Protocols
- O365 OneDrive Integration
- Integrated with MessageSolution Advanced eDiscovery Platform

MessageSolution File Archive Analysis Platform

The Complete On-Premise, Cloud Solution for eDiscovery and Privacy Protection

Enterprise File Storage Management & File Analysis

How File Archive Analysis Works

In addition to archiving the contents of candidate files, MessageSolution FAA transparently collects, replicates, compresses and indexes all data for advanced searching, eDiscovery and compliance management. The MessageSolution Platform supports over 400 file types including all popular formats. Archived data is immediately available for retrieval of business-critical situations, audits or eDiscovery requests.

With configurable and highly granular access controls, users can retrieve their own file data or legal team retrieve data from custodian accounts without IT involvement. After locating the necessary data, it can be restored to the file server, downloaded or compressed in zip files for delivery.

File Analysis

Search Track and reports on storage savings and unprotected sensitive information types by file share & file folder.

File Archiving Storage management provides retention based file analysis by file owner, server, file type, by date timestamps (aging, last modified, created, accessed or deleted dates) and by size. Search Tag and review folders apply Legal holds where archiving tracks timestamps Last modified dates by owner. Restore to original server export for review. Logs by user, by date, by original file server network location.

Built-in DSAR Capabilities

Policy applies scanning Classifiers to identify and Tag Sensitive Information types archived. File Analysis Dashboard allows Privacy protection officers to review Data Subject Access Request by file shares and encrypt delete or download as required.

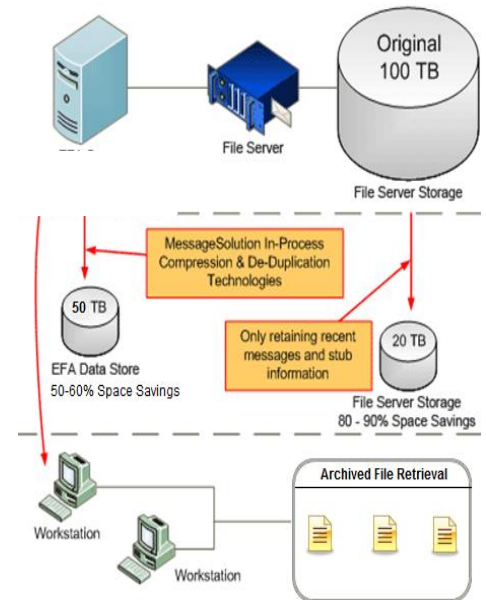

File Server to OneDrive Data Migration

As Microsoft Office 365 becomes increasingly prevalent, organizations are looking for compliant means to migrate data and ensure Privacy protection

MessageSolution Migration System provides SME and enterprise clients the effective tool to migrate data from the file servers and email public folder to SharePoint on-premise and Office 365 SharePoint Online environments.

MessageSolution FAA

Private Cloud

In addition to on-premise archiving, MessageSolution delivers secure and hands-off cloud archiving eDiscovery solutions. With AES and SSL security and regularly audited SOC II Type II data centers, Messagesolution offers safety and functionalities of offline archiving solutions without the overhead costs and daily management for the organizations.

MessageSolution Platform is integrated with BLOB storage in Microsoft Azure, IBM Cloud, and Amazon EC2.

About MessageSolution

MessageSolution, an industry leader in enterprise compliance archiving, eDiscovery &, content security, provides Cloud, on-premise and MSP/ISP-hosted multi-tenant platforms for email, file, and SharePoint data governance. Managing compliance, legal and storage needs, MessageSolution is the recipient of multiple industry awards for providing best enterprise and cloud solutions with technologies deployed in global companies over 50 countries.
