

Thinking About Office 365?

Compliance Archiving & eDiscovery for Office 365

- Compliant Real-Time Archiving
- Corporate Intelligence Protection
- End-To-End, Outsourced eDiscovery
- Auditable, Centralized Data Repository
- Diversified Data Storage & Protection
- Data Immediacy & Ownership

MessageSolution's 3 Steps to an Optimized Migration

Archiving First!

Protect data during the migration process by archive first. If something goes wrong during the process, data is still available in the archive.

Migrate Smart

MessageSolution saves time and money in 2 ways:

- 1) data is archived and migrated simultaneously.
- 2) data can be stubbed (offloaded) during archiving. This transfers the storage burden to the archive leaving less data to actually migrate.

Use a 3rd-Party Archive

1. Personal Archives Only in 365*
 - No Centralized Access
2. Office 365 - Limited eDiscovery Functionality
3. Not Compliant
 - Auto-Purges Deleted Data
4. Risks a Vendor Lock-In
 - Archiving is the Failsafe
5. Limited Compliance Reporting & No Monitoring
6. Costly - Microsoft Email Archiving, on Hosted Exchange Only, Available with Service Plans E3/4 at \$20/user/month

The 1-Vendor Solution— Migration, Archiving & Discovery

Separate solutions for migration, archiving and discovery drive up costs, interfere with deadlines and can destabilize the system as more vendors get involved. MessageSolution takes the 1-vendor approach for end-to-end project management through the migration, archiving, stubbing and discovery processes.

1

Cross-Platform Data Migration

Migrate email, attachments, files, all metadata, calendars, tasks, contacts, Public Folders, PST/NSF/GroupWise files, and more.

Migration Between Email Platforms:

- Exchange, Hosted Exchange
- GroupWise
- Domino
- GMAIL

Between Document Management Platforms:

- Windows/Linux File Systems
- SharePoint, Hosted SharePoint

2

Archive to Archive Migration

Migrate to MessageSolution from any other archiving platform. Migrate to MessageSolution Enterprise Email Archive from Autonomy, Enterprise Vault, ProofPoint, Global Relay, Barracuda, CommVault, etc.

3

Legacy Server Migrations

Upgrade from outdated servers to the latest model with once again, no change in the user-experience

MessageSolution Enterprise Information Archive™

MessageSolution Enterprise Information Archive™ is an award-winning, highly scalable packaged software solution for on-premise, cloud and hybrid storage archiving. With integrated solutions for email, SharePoint and file systems, MessageSolution delivers a combined data management platform for policy-based retention, high-performance searching, controlled data access and high ROI.

“The solution as easy to implement, intuitive to use and easy to manage.”

- Gartner Magic Quadrant

About MessageSolution

MessageSolution is a recognized, industry leader in enterprise-class information archiving, eDiscovery & data migration. Headquartered in Silicon Valley, MessageSolution leverages a homegrown and thoughtfully designed platform to address compliance, legal and storage management needs for all-size organizations.
