

MessageSolution Unveils Enterprise Class Lotus Quickr Archiving Solution at IBM's Lotusphere® 2010

Orlando, Florida, January 19, 2010, and Milpitas, California -- MessageSolution, Inc., the global technology leader in email, file, and SharePoint/Quickr archiving for electronic discovery, litigation support, compliance, storage management, and email server migrations, today unveils MessageSolution Enterprise Quickr Archive, an integrated archiving solution for organizations' Lotus Quickr collaboration environment, at IBM's Lotusphere 2010.

In addition to its enterprise class archiving solutions for email, file and SharePoint servers, MessageSolution now offers a Lotus Quickr archiving solution to complete its unified archiving solutions for all enterprise messaging and document management platforms. MessageSolution utilizes its dynamic storage engine to ensure a seamless integration of all file types, and that the Quickr information is fully archived and indexed. Meanwhile, the built-in high performance search engine ensures that the data will be found promptly.

"MessageSolution Enterprise Quickr Archive is an essential and urgent component adding to our comprehensive product portfolio," says Chief Technology Officer Jeff Liang. "With the advanced functionalities we can provide companies with the integration and collaboration they need when performing electronic discovery, litigations support, compliance and storage management with large volumes of data in IBM Lotus Quickr environment."

MessageSolution Enterprise Archive Suite allows single-instance storage of a document transversely from Lotus Domino servers, Lotus Quickr servers, (or Microsoft Exchange & Share Point) and from file servers. MessageSolution Enterprise Quickr Archive also supports policy management, ensures compliance content control, and to set detailed retention policies by having all Quickr contents stored in one centralized archive. MessageSolution Enterprise Quickr Archive also coincides with contributing to litigation support and electronic discovery for legal counsels and HR managers.

As data grows exponentially throughout the Quickr sites, it produces more risk for the organizations and the ever increasing workload for risk management teams. MessageSolution Enterprise Quickr Archive helps risk management teams effectively control the risk exposure and provide data loss prevention throughout multiple collaboration access sites.

With MessageSolution Enterprise Quickr Archive, storage costs are remarkably reduced through the stubbing process. Through seamless client integration users can access archived documents without any change of normal behavior.

As an IBM Advanced Business Partner, MessageSolution will be exhibiting among IBM's select Business Partners at the Lotusphere Product Showcase under the Government

ISV/Software Solutions

Solution category and in the main exhibition area at booth 719 during Lotusphere 2010, from January 18 – 21, in Orlando, Florida.

About MessageSolution, Inc.

MessageSolution is the global technology leader in email, file, and SharePoint/Quickr archiving for electronic discovery, compliance, content storage management, and email server migrations. MessageSolution enables organizations to mitigate risk, reduce costs and storage requirements, optimize server performance, and comply with industry and federal regulations. Based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Mainland China, along with distribution channels in Europe, Africa, Australia, and Asia Pacific.

MessageSolution Enterprise Email Archive, Enterprise File Archive, and Enterprise SharePoint Archive are on-site and Software as a Service archiving applications serving organizations across all industries, including finance, Legal, healthcare, education, manufacturing, government agencies and non-profit organizations worldwide. MessageSolution software frees IT administrators from daily maintenance and increases overall employee productivity. For more information, visit <http://www.MessageSolution.com>.

MessageSolution is actively working with partners around the world to expand its worldwide business presence. Please visit our web site for more information on the Global Partner Network Program.

What Differentiates MessageSolution Products

Customers continually emphasize MessageSolution products' excellent overall performance, support of all major email servers, and ease of use. MessageSolution provides sub-second data retrieval, an intuitive interface, and ease of deployment and maintenance. MessageSolution's intelligent back-end design significantly reduces installation requirements, backup time, and the need for technical support.

MessageSolution Enterprise Email Archive™ deftly manages petabytes of data daily, a powerful enterprise archiving solution. Electronic discovery and litigation support are empowered by the archive's built-in search engine, which searches through millions of emails within seconds across global locations and data centers. Users can access their archive through their email client, browser, or BlackBerry.

In the first quarter of 2009, MessageSolution became the first archiving vendor in the market to deliver a true 64-bit application that runs on a 64-bit OS machine.

MessageSolution delivers the industry's highest enterprise-level scalability and holds the industry record of archiving 15,000 users on one single MessageSolution archive server. Competitive vendors archive on average 3,000-5,000 users on a single archive server, much less than MessageSolution archiving system's scalability and flexibility. A high in-process compression rate combined with single instance message and attachment archiving slows archive storage growth.

Enterprise Email Archive™ further reduces organizations' storage costs by using only 25-30% of the original mail server storage space for live content archiving. MessageSolution's products support all Latin-based languages, as well as all character-based languages, such as Japanese and Chinese.
