

FOR IMMEDIATE RELEASE

MessageSolution Features Information Archiving and eDiscovery Solution to Replace MacAfee's MX Logic at 2017 InfoSecurity Europe in London

Partnering with email and corporate file security vendors, MessageSolution introduces compliance archiving, legal discovery and storage management for email security space. MessageSolution delivers award-winning advanced information archiving and eDiscovery software solutions for emails, files, and SharePoint archiving, legal discovery, and storage management.

London (June 5, 2017) Industry technology leader in enterprise information archiving and eDiscovery, MessageSolution, will be exhibiting showcasing its award-winning platform to replace MacAfee's discontinued MX Logic archiving solution at InfoSecurity Europe 2017,.

As the General Data Protection Regulation Compliance (GDPR) deadline is approaching in Europe, organizations are looking at leveraging MessageSolution Enterprise Archive for Emails, Files and SharePoint, and the enhanced features and capacities to meet GDPR compliance requirements.

"We deliver feature rich yet easy-to-use eDiscovery and information archiving solutions without the hassle of modifying security storage protocols for an advanced data archiving and restore experience," Explains Kevin McInerney, Global Marketing Strategist at MessageSolution, Inc. "when other cloud archiving providers only work with emails, MessageSolution Platform delivers a full suite of archiving capacity for emails, files and SharePoint documents for companies under GDPR mandates."

Ranked as an "Emerging Player" for Enterprise Email Archiving in Info-Tech's Vendor Landscape, MessageSolution platforms introduces its unique failsafe methodology in cloud and enterprise on-premise to ensure data sovereignty and guarantee continuous users' local data access, regulatory compliance and feature-rich eDiscovery functionalities.

For small-medium-enterprise and large organizations operating, MessageSolution rolled out a special promotion to replace their implementation of MacAfee's email security and MX Logic email archiving systems, and the conversion rate has been a success. The MX Logic Replacement Program enables firms to continue archiving with MessageSolution's leading archiving platform, providing extensive cost-savings by bundling free migration with MessageSolution's open-archive renewal policy in the first year. MessageSolution Service Provider Platform is a Multi-Tenant Cloud Archive for SPs to host and provide high performance email archiving and eDiscovery for email retention with added failsafe SLA for all email platforms, including Microsoft Office 365.

MessageSolution's hands-free cloud archive and eDiscovery platforms are open to integrate with market email security solutions. When security software vendors provide fewer features and functionalities in their compliance archiving and eDiscovery offers, MessageSolution delivers an advanced, cost effective eDiscovery and content archiving experience to integrate and partner with these service providers and email security vendors to leverage their hosting capacities to maximize SPs margin, and advance their technological positions in the market place.

The MessageSolution Advanced eDiscovery Platform includes comprehensive features such as universal legal hold, case management, configurable 3rd party legal/auditor access, data redaction, etc. Data security in the Cloud is a

major issue for organizations regarding safety and accessibility of archived data. To combat data security fears, MessageSolution offers SSL and AES encryption options. In addition, to maintain SSAE 16 Type II certification, all MessageSolution data centers are regularly audited for physical and procedural safeguards. The MessageSolution Cloud Archive also leverages multi-tiered access permissions to granularly manage internal data access permissions.

Additionally, the MessageSolution Cloud Archive Platform and Advanced eDiscovery Center (ADC) works as an extension with Office 365 to provide a comprehensive and feature-rich online service that other email hosting providers (Intermedia, Rackspace, etc.) are not able to deliver. With MessageSolution's extended features, more content archiving and eDiscovery capabilities are available for tailored specific industry needs with full support of Microsoft Office 365 environment. MessageSolution offers necessary extended features not available on Office 365 E3 Plan such as Legal Hold Notification, Tracking or Custodian Acknowledgement, Concurrent Search, and hands-free setup for Legal Hold without the help of IT Department.

"MessageSolution's complete support of Office 365 is the most cost-effective secured archiving solution bundled with Microsoft's Office 365 E1 Plan to meet both compliance and eDiscovery requirements at 37% of the costs," said Kevin Mcinerney. "Only O365 E3/E5 Plans are semi-comparable to MessageSolution features, but E3/or E5 Plan comes with a hefty price tag starting at \$12 per user."

MessageSolution will be exhibiting at InfoSecurity Europe 2017 from March 5th – 8th, 2017. For more press information, please contact via Press@messagesolution.com. For more product information information, visit www.MessageSolution.com or call the company +001 408-383-0100.

About MessageSolution:

MessageSolution provides uninterrupted access to live and historic mail and data protection anywhere. With an additional layer of protection added, multiple copies of data are secured instead of storing data with one provider, such as Office 365 archive. The safe-proof method enables diverse storage email continuity and access to unified eDiscovery, and data migration. With Cloud, service provider hosted multi-tenant, and enterprise on-premise software solutions available, MessageSolution enables organizations of all sizes from all industries to mitigate risk, comply with industry and federal regulations, reduce companies' legal discovery cost, minimize enterprise storage requirements. The MessageSolution Platform supports the organizational and governing backbone to manage the lifecycle of electronic stored information (ESI) by fully integrating with Exchange, Office 365, Lotus Notes Domino, Google Mails, GroupWise and all Linux email platforms and supporting all SharePoint documents, file system and content types.

Founded in 2004 and based in Silicon Valley, California, MessageSolution maintains operations in North America, Europe, and Asia Pacific, along with distribution channels in Europe, Africa, Australia, Asia Pacific and the Middle East. Domestic and international customers are from all sectors of the market place, including U.S. Department of Commerce, Honda China, University of Texas A & M, Randolph School District, Tacoma College, Hong Kong University, Lockheed Federal Credit Union, Federal National Bank, Bank of Manhattan, and the Massachusetts State Court System, etc.
