

MessageSolution to Exhibit at Microsoft Hosting Summit 2013 with Award-Winning Cloud Archiving and MSP Hosted Platform Solutions

MessageSolution will be at Microsoft Hosting Summit 2013 in Seattle, WA to showcase its cutting-edge cloud archiving, MSP-hosted multi-tenant platform and dedicated-hosting solution for email, SharePoint, and file systems

Milpitas, CA and Seattle, WA (May 20, 2013) – MessageSolution, an industry leader in cloud archiving and eDiscovery solutions for email, file system and SharePoint, brings leading-edge technology, user-friendly workflow and virtually unlimited scalability to Microsoft Hosting Summit 2013, a Microsoft annual invitation-only event where only top Microsoft managed service providers (MSP) and partners are invited.

MessageSolution Hosted Cloud Archiving and eDiscovery systems offers companies immediate access to all email data, archived files and SharePoint documents. Cloud-based continuity functionality prevents users from being disconnected from their email during the email server downtime. In addition, all archived data is encrypted with 256-bit encryption, and stored in SSAE 16 Type II certified data centers to ensure utmost security. In addition to information archiving and legal discovery, MessageSolution offers email continuity to protect organizations against email server outages.

“Among the leading information archiving providers in Gartner’s recent Magic Quadrant annual report, MessageSolution is the only vendor to offer service providers a partner-hosted multi-tenant platform that can be managed in MSP’s own data centers or cloud network,” states Kevin McInerney, Global Marketing Strategist at MessageSolution. “Our partners recognize this unique capability, and many partners have chosen to host our solution because of this flexibility, or start with MessageSolution hosted cloud archiving service and transition to partner-hosted platform to offer their own archiving and eDiscovery services a few months after.”

As a Microsoft gold partner, MessageSolution works closely with managed service providers and Microsoft Exchange email platform hosting vendors to optimize revenue opportunities and empower end-clients to regulate compliance, address eDiscovery requests, mitigate legal risks and standardize data organization. MessageSolution MSP partners are able to manage tens of thousands of users on MessageSolution MSP-hosted platform, to maximize the margin while offering critical compliance archiving and litigation support to its client base.

Gartner ranked MessageSolution among industry leader in its recent Magic Quadrant Report ““MessageSolution's Enterprise Archiving and Enterprise eDiscovery are simple to deploy and manage, and easy to use (all cited by customers as important selection requirements). Customer satisfaction is high.”

MessageSolution partners with acclaimed hosting partners to provide their clients with the ease of managing their own data without the burdens and costs of an on-premise solution. MessageSolution also provides MSP partners streamlined system on-boarding and support through advanced Parallels integration for system provisioning and billing.

MessageSolution also offers an optional 2-step MSP program to implement MessageSolution hosted archiving service to quickly initiate MSP partners to offer the archiving and eDiscovery

services to its client base right away in the first period of service. This initial program can be hosted by MessageSolution as a training program to familiarize the partners with managing and operating MessageSolution MSP-hosted platform, a hands-on product training process participated by a number of service providers. Once comfortable with the platform and data workflow, partners can incrementally take over hosting duties and management of client archived data and the archiving platform on their own.

MessageSolution Enterprise Archive for email, file system and SharePoint, an enterprise-class on-premise solution with SharePoint management and archiving module, maximizing large data and BLOB storage offloading from SharePoint, while delivering a tight integration between company's email system and SharePoint, the Outlook-SharePoint Drag 'n Drop functionality, a SharePoint user-friendly workflow as part of MessageSolution's email, document and storage management system to address today's corporates' issues generated by large volume of the Big Data.

Microsoft Hosting Summit 2013

Microsoft Hosting Summit is an invitation-only event for Microsoft hosting partners. It is held each year for industry professionals to connect and share ideas on how to drive innovation, expand new services, and build business opportunities.

MessageSolution will exhibit at Microsoft Hosting Summit from May 21-23, 2013 in Seattle, WA. Contact MessageSolution at (408) 383-0100 or email Press@MessageSolution.com.
