MessageSolution[™]

Customer Driven Trusted Partner

Archiving and Disaster Recovery

For companies facing the growing challenges surrounding rising costs and complications of electronic document supervision, storage, and recovery, MessageSolution and FalconStor Software provide MessageSolution Enterprise Email Archive (EEA) with FalconStor Continuous Data Protector (CDP) Virtual Appliance, a secure, cost-effective, and high-performance email archiving and disaster recovery solution.

MessageSolution Enterprise Email Archive with FalconStor CDP Virtual Appliance dramatically reduces the cost and complexity of Exchange archiving and disaster recovery. Businesses can easily search through massive quantities of emails and immediately restore information using MessageSolution EEA with FalconStor CDP Virtual Appliance.

Reduce Your Business & IT Risks Surrounding:

- Disaster Recovery
- Storage Optimization
- Information Retention
- Compliance & E-Discovery
- Knowledge Exploitation
- Operational Efficiency

MessageSolution EEA with FalconStor CDP Virtual Appliance:

- Single instance storage of emails and attachments integrated with all servers & clustering
- Easy, fast and secure access to archived messages directly from Outlook clients, OWA, web browser, off line, and even BlackBerry mobile devices
- Full text keyword and key phrase searching
- Fast, accurate search and user-friendly web-based administrative interfaces
- Hierarchical storage optimization
- 1 minute to recover from Exchange Server failure, 5 minutes to recover from Exchange boot disk failure, and 30 minutes to recover from Exchange hardware failure
- Powerful disaster recovery capabilities without hardware constraints
- Ability to leverage virtualized server environments for maximum flexibility and hardware savings

Benefits

Reduce Storage Requirements for Email & Attachments by 75%

MessageSolution's completely automated file compression and single instance storage reduce email storage requirements.

Fast, Simple Data Recovery

FalconStor CDP Virtual Appliance protects physical and virtual Exchange servers with a single system, ensuring complete server and data protection for business continuity and optimal service levels.

100% Information Availability

End-users have access to their personal archives through a webbased console, Outlook integration, OWA, Blackberry mobile devices and even from off line.

Deliver the Most Secure System

Online and offline security eliminates the possibility of accidental data deletion.

Maximum Flexibility

MessageSolution EEA and FalconStor CDP Virtual Appliance work with any SAN or direct attached disk for maximum user flexibility and cost control.

Email Client Access

MessageSolution's Enterprise Email Archive Product Family

In addition to archiving the contents of emails, attachments, calendar files, Enterprise Email Archive captures, indexes and archives all compliance-related metadata. The archiving process is completely transparent to end-users and requires no additional software or database purchases. EEA is simple to use is deployed quickly and remotely. EEA comes in comprehensive three affordable editions for more information, please visit

www.messagesolution.com/email_archiving.htm.

MessageSolution Works for You

MessageSolution Enterprise Email Archive helps businesses organize and search corporate intelligence quickly and securely, even across multiple geographic locations, without IT assistance. Unicode support allows users to search in any language, including Latin-based and character-based languages.

Disaster Recovery with FalconStor CDP Virtual Appliance

Restoring Exchange servers after a crash can monopolize IT time and resources. However, with MessageSolution EEA and FalconStor CDP Virtual Appliance businesses can recover from Exchange Server failure in 1 minute, recover from Exchange boot disk failure in 5 minutes, and recover from Exchange hardware failure in 30 minutes. FalconStor CDP Virtual Appliance provides continuous backup and instant recovery for Exchange servers, while MessageSolution EEA ensures business-critical email data remains available to end-users.

Giving Customers Control and Support

The policy-based archive allows archive administrators to easily manipulate retention parameters and user access rights to meet each organization's unique archiving objectives.

System Requirements:

Pentium IV 2.0 GHz (minimum) 2 - 4 GB RAM Processor equivalent to email server 40 GB hard disk Internet Explorer 6, Firefox 1.x 1 Network Interface card Machine with access to DNS service Windows 2000, 2003, 2008
