

MessageSolution Enterprise SharePoint Archive

Cloud & Enterprise On-Premise Archiving eDiscovery Platform

MessageSolution SharePoint Archive Improves company's Document & IP Governance, Protection, and Performance

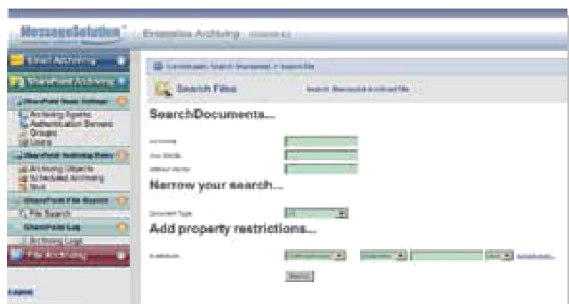

MessageSolution, the global technology leader in enterprise archiving eDiscovery solutions, enables enterprise customers to archive Microsoft SharePoint documents (SharePoint sites, files, and site mailboxes) for regulatory compliance, litigation readiness, protect corporate intellectual properties, increasing user's productivity and improving SharePoint performance.

With Microsoft Client Object Protocol support and Azure AD integration, MessageSolution Enterprise SharePoint Archive can be deployed standalone or in conjunction with MessageSolution Enterprise Email Archive and/or Enterprise File Archive. All archiving modules can be deployed on the same server, stored in the same repository, and accessed from the same web-based user interface, making data management, backup and data restoration faster and more streamlined.

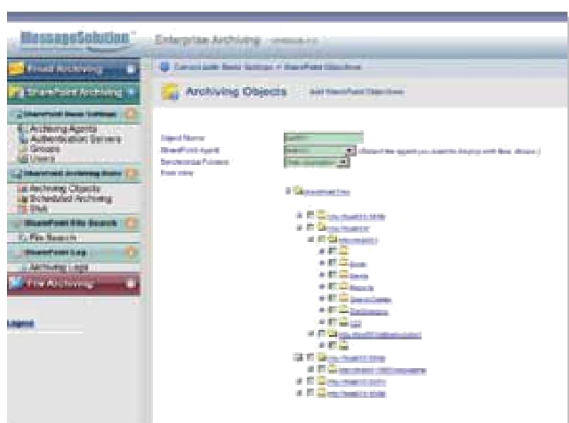

Benefits of MessageSolution Enterprise SharePoint Archive

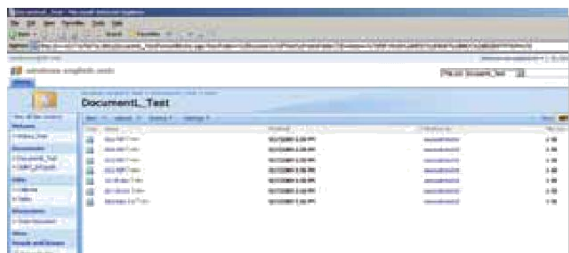

- eDiscovery and Governance for SharePoint includes legal hold and tagging features
- Create content alerts based on Personal Identification Information
- Unicode based search engine enables search in all languages
- Supports Premium AD Information Protection Services classification and Tagging
- Centralized archiving of corporate email, OneDrive files and SharePoint documents from Office 365 to MessageSolution Platform which reduces time and costs for eDiscovery
- Offload SharePoint data to more cost effective storage devices to reduce storage costs for HSM
- Object Storage Azure Offload SharePoint data to more cost-effective storage for long term retention

SharePoint Search Files

SharePoint Archiving Objects

SharePoint Web Page
