

# SharePoint Management Solutions

MessageSolution, a global leader in Enterprise Informational Archiving, eDiscovery, SharePoint management, and cross-server migration, enables SharePoint administrators to completely manage and preserve all SharePoint content types with award-winning enterprise archiving and SharePoint Management Platforms.

## Enterprise SharePoint Archive

MessageSolution Enterprise SharePoint Archive (ESA) archives all SharePoint Content to ensure regulatory compliance, restore lost files, manage exponential data growth and optimize the SharePoint server. Advanced search features deliver fast and accurate results while single instance storage and de-duplication keep data volume manageable. Administrators control local access and can grant or remove privileges to any user at any given time.

## eDiscovery & Governance For SharePoint

The MessageSolution SharePoint eDiscovery Platform allows system administrators and auditors to search and access archived data for legal and eDiscovery purposes. Administrators can place SharePoint objects on legal hold to ensure that relevant data is not deleted regardless of any set retention period. Legal Hold Notifications inform administrators and custodians of new or escalated legal holds. Other features such as tagging and annotation help with collaboration and organization while maintaining the integrity of the original document.

## SharePoint Migration

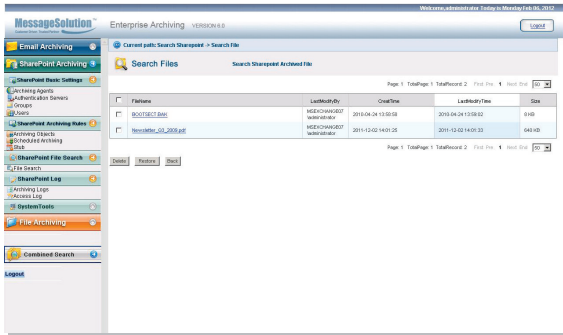

With the MessageSolution SharePoint Migration System, organizations can migrate from legacy editions to the newest SharePoint Platforms i.e. moving from SharePoint 2007 to SharePoint 2010. It can consolidate multiple SharePoint repositories for central access and organization. The MessageSolution Migration System also allows enterprises to migrate content from public folders and file servers into SharePoint.

## Why Use MessageSolution Enterprise SharePoint Archive?

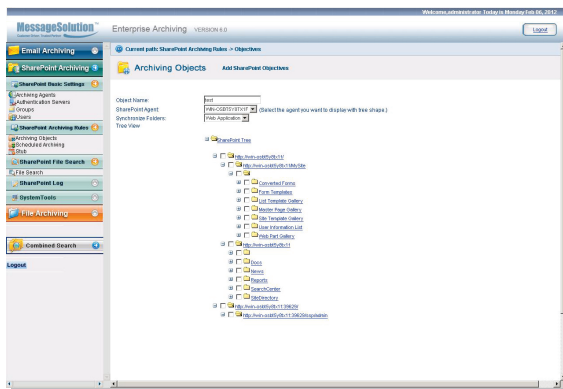

- **Control Exponential Data Growth**
- **Offload data from the SharePoint servers to improve performance**
- **Instantly search, access and restore SharePoint files in seconds**
- **Instantly hand over critical electronically stored data (ESI) for legal and regulatory compliance**
- **Reduce data storage by up to 85% saving money on hardware and storage costs**
- **Archive for 25,000 + users on one single archiving server**
- **Available in enterprise On-Premise, public & private Cloud platforms**
